

Curriculum Vitae

As an elementary schooler, I was enrolled in Justin Thomas Primary School, Enugu. It was really a good environment for experience.

Around the time I was in fourth grade, my classmates were always talking about what they wanted to do as a profession. At that time, would begin to ask myself, "Why am I the only person that doesn't know what they want to do?" This question remained on my mind until I entered secondary school and was enrolled in Grundtvig International Secondary School, Oba.

This was another stage of my life where I needed an answer to that question because this was the part of schooling where it was highly considered but while I was still in junior school I decided to put it aside for the mean time and focus on my studies.

In Jss3, I was then asked to fill a form for the subjects I wanted to offer in my senior school. Now, any person who was put in this situation would know that this would also determine your grades in the subjects needed for the course you have chosen to study.

My school, knowing that we needed enough time to think about it, allowed us to take the form home during the long vacation and think through it thoroughly.

This holiday I had decided to go for coding classes to take up my time during this holiday. Being there has been a life changing experience because I finally decided what I want to do in future.

Being a programmer was something I had never considered but now it is what I have decided to put my all into.
